**CAP and Fresno County Partner
in New Detoxification Center**

Comprehensive Addiction Programs, Inc. (CAP), in partnership with Fresno County Department of Behavioral Health, will open a new detoxification and pre-treatment stabilization center on July 5, 2011. The center will be a free-standing, non-medical residential detoxification unit serving adult men and women in a 14-day program at CAP's facility at 2445 West Whites Bridge in Fresno.

This program will offer a safe, supportive environment for individuals to withdraw from using drugs and alcohol and will connect them to addiction treatment and recovery services. Fresno County will provide financial support for eight of the 12 beds for those individuals unable to pay. Four of the County beds are reserved for clients referred by local hospital emergency departments.

Juanita Fiorello, CAP's executive director, believes this service plan is a significant improvement over traditional stays of three to five days for detoxification only. "The extended stay allows adequate time for trained staff to stabilize and assess participants and will help them develop plans for transitioning to treatment services in the community."

Services include bedroom and bath facilities, nutritious meals and snacks, basic personal necessities, 24-hour supervision, withdrawal support, peer group counseling, addiction education, and mental health assessments where indicated.

In addition, clients will receive assistance with decisions about their continued treatment and recovery needs. Recommendations for further care may include residential treatment, outpatient treatment or sponsorship programs such as Bridging the Gap and Alcoholics Anonymous or Narcotics Anonymous.

For those able to pay, the cost of treatment is \$65 per day or \$910 for 14 days. Private payment and credit cards are accepted. The new center is one more way that CAP continues its 39-year tradition of providing treatment and recovery services. For more information about detox services please call (559) 264-5096.
